AQUAPROS WATERPROOF CLOTHING
CATALOG 2026

aQuapros
breathable clothing

Breathable jacket model 285

aQuapros | 

Material:

aQuaAir
REGULAR

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- vapor-permeable material
- splash-proof zipper closure
- cuffs in the sleeves
- puller of the lower part
- high-waisted hood with face adjustment

Winter breathable jacket model 1031 OC

aQuapros | 

Material:

aQuaAir
REGULAR

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- zipper closure covered with a pleat with press studs
- ribbed cuffs and back
- numerous pockets
- stand-up collar around the neck finished with fleece
- vapor-permeable upper material
- jacket insulated with polyester material

Breathable bibpants model 298

aQuapros | 

Material:

aQuaAir
REGULAR

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- vapor-permeable material
- 2 combat pockets on the sides of the legs
- large breast pocket
- bottoms of legs fastened with splash-proof zippers
- adjustable straps

Breathable trousers model 288

aQuapros | 

Material:

aQuaAir
REGULAR

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- waist trousers
- vapor-permeable material
- 2 combat pockets on the sides of the legs
- bottoms of legs fastened with splash-proof zippers
- elastic waistband

Insulated overalls model 104/1 OC

aQuapros | 

Material:

aQuaAir
REGULAR

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- made of breathable material
- special polyester insulation
- zipper closure covered with a double pleat
- windbreaks in sleeves
- adjustable hood

Overalls model 104/1

aQuapros | 

Material:

aQuaAir
REGULAR

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- made of breathable material
- zipper closure covered with a double pleat
- drawstring at the back
- windbreaks in sleeves
- adjustable hood

aQuapros
standard clothing

Jacket model 4083

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- zip fastening with a placket
- increased durability of seams
- underarm ventilation
- sleeve regulation
- two front pockets with patches

Jacket model 4085

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- fastening with metal press studs
- increased durability of seams
- adjustable hood
- underarm ventilation
- two front pockets with patches

Coat model 4088

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- fastening with press studs
- increased durability of seams
- sleeve hem adjustment
- underarm ventilation
- hood adjustment

Waist jacket model 4082

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- zip fastening with a placket
- increased durability of seams
- adjustable hood
- underarm ventilation
- cuffs and waist cuffs

Bibpants model 4087

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- adjustable braces
- wide elastic band on the back
- increased durability of seams
- leg adjustment
- pocket openings concealed by a flap

Overall model 4084

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- zip with placket
- adjustable hood and collar
- increased durability of seams
- drawstring waist
- adjustable sleeves and legs

Waist trousers model 4086

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343

Specific features:

- rubber in the waist for regulation
- increased durability of seams
- leg adjustment
- pocket openings concealed by a flap

**Warning jacket
model 4185**

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- reflective tapes
- visibility class 3
- increased durability of seams
- sleeve regulation
- hood can be adjusted with drawstring

Warning coat model 4188

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- reflective tapes
- visibility class 3
- increased durability of seams
- sleeve fastening and adjustment with press studs
- underarm ventilation holes

**Warning bibpants
model 4187**

Material: PVC/Polyester

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- visibility class 1
- increased durability of seams
- reflective tapes
- leg circumference regulation
- pocket inlets with flap

Warning pants model 4186

Material: PVC/Polyester

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- visibility class 1
- reflective tapes
- increased durability of seams
- rubber cuff at waist
- leg circumference adjustment

**Warning overall
model 4184**

aQuapros | 

Material: Polyurethane/Polyamide

 **aquaproof** vision

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- visibility class 3
- increased durability of seams
- reflective tapes
- leg and sleeve regulation
- zipper with placket

Warning jacket model 4283

aQuapros |

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- visibility class 3
- increased durability of seams
- reflective tapes
- comfortable zipper with placket
- underarm ventilation holes

Warning jacket model 4285

aQuapros |

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- visibility class 3
- reflective tapes
- increased durability of seams
- ventilation holes under armpits
- sleeve regulation

Warning overall model 4287

aQuapros |

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- increased durability of seams
- reflective tapes
- visibility class 1
- leg circumference regulation
- pocket inlets with flap

Warning pants model 4286

aQuapros |

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- visibility class 1
- reflective tapes
- increased durability of seams
- rubber cuff at waist
- leg circumference adjustment

**Warning overall
model 4284**

aQuapros | 

Material: Polyurethane/Polyamide

 **aquaproof**
basic

 **aquaproof**
vision

Weight: 180 g/m²

Size: 48-62

Fluo colour:

Norms:

- EN ISO 13688
- EN 343
- EN ISO 20471

Specific features:

- increased durability of seams
- reflective tapes
- visibility class 3
- leg and sleeve regulation
- zipper with placket

Jacket model 4485

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343
- EN 1186

Specific features:

- straight cut
- increased durability of seams
- fastening with press studs and inner placket
- underarm ventilation slots
- ribbing on sleeves

Sleeves model 4402

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343
- EN 1186

Specific features:

- increased durability of seams
- length to elbow
- welt on both sides
- effective protection of hands

Waist pants model 4486

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343
- EN 1186

Specific features:

- increased durability of seams
- comfortable elastic waistband
- pocket inlets
- leg circumference adjustment

Bibpants model 4487

Material: Polyurethane/Polyamide

Weight: 180 g/m²

Size: 48-62

Colour:

Norms:

- EN ISO 13688
- EN 343
- EN 1186

Specific features:

- raised front and back
- increased durability of seams
- adjustable harness
- wide elastic band at the back
- adjustable leg girths

Materials type charts

	Waterproof material with polyester backing, PVC coated on one side. It is characterized by tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with polyester backing, coated with PVC. It is characterized by tear resistance and waterproofness. The chemical composition of the coating has acid-protective properties that guarantee resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN 14605, which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with polyester backing, PVC coated on one side. It is characterized by increased visibility as well as tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN ISO 20471, which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with cotton backing, PVC coated on one side. It is characterized by increased visibility as well as tear resistance and waterproofness. The chemical composition of the coating has antistatic and flame-retardant properties and guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), EN 1149-5, EN ISO 20471 and EN ISO 14116, which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with polyester backing, PVC coated on one side. It is characterized by tear resistance and waterproofness. The chemical composition of the coating has antistatic properties and guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN 1149-5, which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with polyester backing, PVC coated on one side. It is characterized by increased tear resistance and waterproofness. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with cotton backing, PVC coated on one side. It is characterized by tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with polyester backing, PVC coated on one side. It is characterized by increased visibility as well as tear resistance and waterproofness. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with polyester backing, coated with PVC. It is characterized by tear resistance and waterproofness. The chemical composition of the coating has acid-protective properties and guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN 13034, which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with a polyester backing made from recycled yarn, coated on one side with PVC. It is characterized by tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, maintaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 – at least 20000 Pa), as confirmed by tests conducted by an accredited textile testing institute.
	Material on polyamide backing, coated on one side with polyurethane. It is characterized by resistance to tearing, adverse weather conditions and bending at temperatures down to -50°C.
	A new concept of PVC-coated material. It is characterized by tear resistance and waterproofness. Meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute. No maintenance is required.
	Polyurethane film is characterized by high resistance to mechanical damage and high and low temperatures. The chemical composition of the material guarantees proper protection against the action of fats, detergents, weak acids, bases and organic liquids.
	Material coated on one side with polyvinyl chloride. It is characterized by high tear and tensile resistance and waterproofness. The chemical composition of the coating is characterized by resistance to salt water and extreme weather conditions. The material retains its properties during use at low temperatures. Meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.

	Material coated on one side with polyvinyl chloride. It is characterized by high tear and tensile resistance and waterproofness. The chemical composition of the coating is characterized by high resistance to salt water and extreme weather conditions. The material retains its properties during use at low temperatures. Meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material on polyamide backing, coated on one side with polyurethane. It is a low-weight, high-strength material to provide proper protection and comfort during heavy work. It is characterized by high elasticity, tear resistance and waterproof seams. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions and bending at temperatures down to -50°C. The material meets the requirements of EN ISO 13688 and EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
	Superbly protects not only against water and wind. Thanks to the use of fluorescent pigments, it makes the wearer more visible and safe in conditions of reduced visibility at night. The material meets the requirements of EN ISO 13688, EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN ISO 20471, which was confirmed in tests conducted by accredited textile testing institutes.
	A material designed for the production of garments for the food industry. A properly selected blend of coating components guarantees resistance to the penetration of fats, enzymes, digestive juices and the action of acid and alkali solutions. The material meets the requirements of EN 1186, which was confirmed in tests conducted by an accredited textile testing institute.
	Waterproof material with a polyamide backing, coated on one side with polyurethane. This is a lightweight material with high strength properties, ensuring proper protection and comfort during demanding work. It is characterized by high flexibility, tear resistance, and waterproof seams. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions and bending at temperatures down to -50°C. The material meets the requirements of EN ISO 13688 and EN 343 (resistance to water penetration in the highest class 4 – at least 20000 Pa), as confirmed by tests conducted by an accredited textile testing institute.
	aQuaAir is a series of modern laminated breathable fabrics with the highest waterproofing and breathability parameters. These materials are used to produce a wide range of protective clothing and outdoor clothing used during work and outdoor activities. They meet the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa and high breathability), which was confirmed in tests conducted by an accredited textile testing institute.
	aQuaAir REGULAR is a 2-layer fabric with lining and a waterproof breathable membrane. It meets the requirements of EN 343 standard (highest class 4 water penetration resistance – water column pressure exceeding 20000 Pa, and high breathability – highest class 4 water vapor resistance up to 15 Ret [M² Pa/W]), as confirmed in tests conducted by an accredited institute specializing in textile material research.
	aQuaAir EASY SEE is a 2-layer fabric with lining, a waterproof breathable membrane, and an outer fabric with fluorescent properties for high-visibility clothing. It meets the requirements of the EN 343 standard (highest class 4 water penetration resistance – water column pressure exceeding 20000 Pa, and high breathability – highest class 4 water vapor resistance up to 15 Ret [M² Pa/W]), as confirmed in tests conducted by an accredited institute specializing in textile material research.
	aQuaAir MULTI is a 3-layer fabric with lining, a waterproof breathable membrane, and a multifunctional outer fabric. The fluorescent-colored material is resistant to fire, convective heat, and other hazards encountered during welding, chemical work, and explosive environments. It meets the requirements of the EN 343 standard (highest class 4 water penetration resistance – water column pressure exceeding 20000 Pa, and high breathability – good class 3 water vapor resistance 17,35 Ret [M² Pa/W]), as confirmed in tests conducted by an accredited institute specializing in textile material research.
	XT4L is a modern and technologically advanced material with a high class of waterproofness (30000 mm H2O = class 4 according to the EN 343 standard) and vapor permeability (6500g/m2/24h = class 4 breathability according to EN 343). The material consists of 4 layers (fabric - 100% polyester, hydrophobic microporous coating - 100% polyurethane, non-porous hydrophilic membrane - 100% polyurethane, mesh knit/combined lining - 100% polyamide), which provide excellent protection against water while removing moisture and excess heat.
	termoizol material has a special thermal coating with the ability to reflect and retain heat generated by the body. Thanks to the technology used, thermal insulation has been increased, which affects the comfort of use at low ambient temperatures. The innovative solution is based on a special metalized layer of flexible polyurethane coating with an admixture of silver, combined with a mesh polyester lining. This composition acts as a barrier that effectively reflects the heat energy generated by the body and allows it to be retained inside the clothing.
