Jacket model 101/S

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- fastening with metal press studs
- increased durability of seams
- hood with drawstrings
- two front pockets covered with patches
- cuffs in the sleeves

Insulated jacket model 103 OCS

Material: PVC/Polyester, Polyester/PU
Plavitex
TERMOIZOL

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- zip fastening with pleat
- hood with insulation and the possibility of adjustment
- collar lined with soft fleece
- termoisol insulation on the inside
- two side pockets

Jacket model 102

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- overhead jacket
- fastening at the neck with two flaps with press studs
- increased durability of seams
- cuffs on sleeves
- hood with drawstrings

Jacket model 103

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- jacket with a zip and placket
- increased durability of seams
- hood with drawstring
- collar with fleece
- adjustable elasticated cuffs

Jacket model 300

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- jacket with a zip and placket
- increased durability of seams
- detachable hood
- underarm vents
- adjustable elasticated cuffs
- drainage gutter

Jacket model 071 Guard/Firefighter

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- jacket with press studs
- increased durability of seams
- two types of reflective tape
- possibility to make a dedicated service mark
- hood with drawstrings

Jacket model 616

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- jacket with a zip and placket
- increased durability of seams
- cuffs on sleeves
- hood with drawstrings
- front pockets with patches

Jacket model 181

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- jacket with press studs
- increased durability of seams
- two-tone design
- hood with drawstrings
- front pockets with patches

Fishing jacket model 1066

Material: PVC/Polyester
Plavitex heavy duty

Weight: 700 g/m²

Size: 48-62

Kolory:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- jacket worn over the head
- increased strength of seams
- vestibules in sleeves
- adjustable hood
- neck fastening with press studs

Coat model 106

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- coat fastened with press studs
- protects the user's legs from water
- increased durability of seams
- hood with drawstrings
- front pockets with patches

Poncho model 105 S/PRYZ Guard

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- the cloak is fastened with press studs
- equipped with reflective tapes
- increased durability of seams
- equipped with a hood
- holes with flaps for hands

Poncho model 105

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- the cloak is fastened with press studs
- protects the user's legs from water
- increased durability of seams
- equipped with a hood
- holes with flaps for hands

Bibpants model 001

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- adjustable braces
- wide elastic band on the back
- increased durability of seams
- high front
- comfortable fastening

Insulated bibpants model 001 OCS

Material: PVC/Polyester, Polyester/PU
Plavitex
TERMOIZOL

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- waterproof and thermal properties
- durable outer material
- termoisol insulation on the inside
- raised front
- comfortable suspenders with adjustment

Bibpants model 001 MAX

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- adjustable braces
- additional reinforcement on the knees
- wide elastic band on back
- increased durability of seams
- high front

Fishing bibpants model 1066

Material: PVC/Polyester
Plavitex heavy duty

Weight: 700 g/m²

Size: 48-62

Kolory:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- increased durability
- adjustable braces made of rubber
- internal, lockable pocket
- practical fastening
- resistance to sea water

Clothing set model 101/001

Material: PVC/Polyester
Plavitex
Weight: 350 g/m²
Size: 48-62
Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- set of ¾ jacket + bibpants
- adjustable braces
- hood with drawstrings
- wind vest in sleeves
- increased durability of seams

Clothing set model 101/112

Material: PVC/Polyester
Plavitex
Weight: 350 g/m²
Size: 48-62
Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- set of ¾ jacket + waist trousers
- hood with drawstrings
- wind vest in sleeves
- increased stitching strength

Clothing set model 102/013

Material: PVC/Polyester
Plavitex
Weight: 350 g/m²
Size: 48-62
Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- the pull-on jacket + bibpants
- adjustable braces
- hood with press studs
- windbreakers in the sleeves and legs
- increased durability of seams

Waist trousers model 112

Material: PVC/Polyester
Plavitex
Weight: 350 g/m²
Size: 48-62
Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- basic model
- leg girth adjustment
- comfortable press studs
- drawstring waist with elastic
- increased durability of seams

Overall model 104

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- one-piece suit
- zip with double placket
- adjustable drawstring hood
- windbreakers in the sleeves and legs
- increased durability of seams

Overall model 104R

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- one-piece suit
- zip with double placket
- reflective tapes
- windbreakers in the sleeves and legs
- increased durability of seams

Overall with boots model 104/K

Material: PVC/Polyester
Plavitex heavy duty

Weight: 700 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- boots 'combined to the overall
- zip fastening with a placket
- increased seam strength
- windbreakers in the sleeves
- adjustable hood

Overall model 304/K

Material: PVC/Polyester
Plavitex fluo
Plavitex heavy duty

Weight:
350 g/m²
700 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- boots combined with overall
- two thicknesses of material
- increased durability of seams
- back zip with splash-proof closure
- rib cuffs

Hat model 045

Material: PVC/Polyester
Plavitex

Weight: 350 g/m²

Size: XS – 4XL

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- effective head protection against wind and rain
- fleece lined on the inside
- adjustable head harness
- comfortable roundabout
- large range of sizes

Overall for sewer worker 604/K

Material: PVC/Polyester
Plavitex fluo
Plavitex hd fluo

Weight:
350 g/m²
700 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343
- EN ISO 20345 - S5 SRC

Specific features:
- made of materials of two thicknesses
- splash-proof zipper closure
- visibility tapes
- safe boots class S5 SRC
- adjustable hood and cuffs in the sleeves

Overall mtodel 303

Material: PVC/Polyester
Plavitex heavy duty

Weight: 700 g/m²

Size: 48-62

Colour:

Norms:
- EN ISO 13688
- EN 343

Specific features:
- protection against stings
- zip fastening
- windflaps on sleeves and legs
- increased durability of seams
- visor with protective mesh

Materials type charts

Plavitex	Waterproof material with polyester backing, PVC coated on one side. It is characterized by tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex acid	Waterproof material with polyester backing, coated with PVC. It is characterized by tear resistance and waterproofness. The chemical composition of the coating has acid-protective properties that guarantee resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN 14605, which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex fluo	Waterproof material with polyester backing, PVC coated on one side. It is characterized by increased visibility as well as tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN ISO 20471, which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex multi	Waterproof material with cotton backing, PVC coated on one side. It is characterized by increased visibility as well as tear resistance and waterproofness. The chemical composition of the coating has antistatic and flame-retardant properties and guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), EN 1149-5, EN ISO 20471 and EN ISO 14116, which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex antistatic	Waterproof material with polyester backing, PVC coated on one side. It is characterized by tear resistance and waterproofness. The chemical composition of the coating has antistatic properties and guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN 1149-5, which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex heavy duty	Waterproof material with polyester backing, PVC coated on one side. It is characterized by increased tear resistance and waterproofness. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex hd antistatic	Waterproof material with cotton backing, PVC coated on one side. It is characterized by tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex hd fluo	Waterproof material with polyester backing, PVC coated on one side. It is characterized by increased visibility as well as tear resistance and waterproofness. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex chemo	Waterproof material with polyester backing, coated with PVC. It is characterized by tear resistance and waterproofness. The chemical composition of the coating has acid-protective properties and guarantees resistance to adverse weather conditions, retaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN 13034, which was confirmed in tests conducted by an accredited textile testing institute.
Plavitex eco	Waterproof material with a polyester backing made from recycled yarn, coated on one side with PVC. It is characterized by tear resistance and waterproofness. The chemical composition of the coating guarantees resistance to adverse weather conditions, maintaining its properties at temperatures down to -50°C. The material meets the requirements of EN 343 (resistance to water penetration in the highest class 4 – at least 20000 Pa), as confirmed by tests conducted by an accredited textile testing institute.
PROVENDEX	Material on polyamide backing, coated on one side with polyurethane. It is characterized by resistance to tearing, adverse weather conditions and bending at temperatures down to -50°C.
RUBBER NEW GENERATION	A new concept of PVC-coated material. It is characterized by tear resistance and waterproofness. Meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute. No maintenance is required.
PU	Polyurethane film is characterized by high resistance to mechanical damage and high and low temperatures. The chemical composition of the material guarantees proper protection against the action of fats, detergents, weak acids, bases and organic liquids.
SEALSKIN	Material coated on one side with polyvinyl chloride. It is characterized by high tear and tensile resistance and waterproofness. The chemical composition of the coating is characterized by resistance to salt water and extreme weather conditions. The material retains its properties during use at low temperatures. Meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.

opalo	Material coated on one side with polyvinyl chloride. It is characterized by high tear and tensile resistance and waterproofness. The chemical composition of the coating is characterized by high resistance to salt water and extreme weather conditions. The material retains its properties during use at low temperatures. Meets the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
GENUINE TEXTILE BRAND aquaproof basic	Waterproof material on polyamide backing, coated on one side with polyurethane. It is a low-weight, high-strength material to provide proper protection and comfort during heavy work. It is characterized by high elasticity, tear resistance and waterproof seams. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions and bending at temperatures down to -50°C. The material meets the requirements of EN ISO 13688 and EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa), which was confirmed in tests conducted by an accredited textile testing institute.
GENUINE TEXTILE BRAND aquaproof vision	Superbly protects not only against water and wind. Thanks to the use of fluorescent pigments, it makes the wearer more visible and safe in conditions of reduced visibility at night. The material meets the requirements of EN ISO 13688, EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa) and EN ISO 20471, which was confirmed in tests conducted by accredited textile testing institutes.
GENUINE TEXTILE BRAND aquaproof food	A material designed for the production of garments for the food industry. A properly selected blend of coating components guarantees resistance to the penetration of fats, enzymes, digestive juices and the action of acid and alkali solutions. The material meets the requirements of EN 1186, which was confirmed in tests conducted by an accredited textile testing institute.
GENUINE TEXTILE BRAND aquaproof sport	Waterproof material with a polyamide backing, coated on one side with polyurethane. This is a lightweight material with high strength properties, ensuring proper protection and comfort during demanding work. It is characterized by high flexibility, tear resistance, and waterproof seams. The chemical composition of the coating guarantees exceptional resistance to adverse weather conditions and bending at temperatures down to -50°C. The material meets the requirements of EN ISO 13688 and EN 343 (resistance to water penetration in the highest class 4 – at least 20000 Pa), as confirmed by tests conducted by an accredited textile testing institute.
aQuaAir	aQuaAir is a series of modern laminated breathable fabrics with the highest waterproofing and breathability parameters. These materials are used to produce a wide range of protective clothing and outdoor clothing used during work and outdoor activities. They meet the requirements of EN 343 (resistance to water penetration in the highest class 4 - water column pressure over 20000 Pa and high breathability), which was confirmed in tests conducted by an accredited textile testing institute.
aQuaAir REGULAR	aQuaAir REGULAR is a 2-layer fabric with lining and a waterproof breathable membrane. It meets the requirements of EN 343 standard (highest class 4 water penetration resistance – water column pressure exceeding 20000 Pa, and high breathability – highest class 4 water vapor resistance up to 15 R_{et} [M^2 Pa/W]), as confirmed in tests conducted by an accredited institute specializing in textile material research.
aQuaAir EASY SEE	aQuaAir EASY SEE is a 2-layer fabric with lining, a waterproof breathable membrane, and an outer fabric with fluorescent properties for high-visibility clothing. It meets the requirements of the EN 343 standard (highest class 4 water penetration resistance – water column pressure exceeding 20000 Pa, and high breathability – highest class 4 water vapor resistance up to 15 R_{et} [M^2 Pa/W]), as confirmed in tests conducted by an accredited institute specializing in textile material research.
aQuaAir MULTI	aQuaAir MULTI is a 3-layer fabric with lining, a waterproof breathable membrane, and a multifunctional outer fabric. The fluorescent-colored material is resistant to fire, convective heat, and other hazards encountered during welding, chemical work, and explosive environments. It meets the requirements of the EN 343 standard (highest class 4 water penetration resistance – water column pressure exceeding 20000 Pa, and high breathability – good class 3 water vapor resistance 17,35 R_{et} [M^2 Pa/W]), as confirmed in tests conducted by an accredited institute specializing in textile material research.
XT4L®	XT4L is a modern and technologically advanced material with a high class of waterproofness (30000 mm H20 = class 4 according to the EN 343 standard) and vapor permeability (6500g/m2/24h = class 4 breathability according to EN 343). The material consists of 4 layers (fabric - 100% polyester, hydrophobic microporous coating - 100% polyurethane, non-porous hydrophilic membrane - 100% polyurethane, mesh knit/combined lining - 100% polyamide), which provide excellent protection against water while removing moisture and excess heat.
TERMOIZOL	termoizol material has a special thermal coating with the ability to reflect and retain heat generated by the body. Thanks to the technology used, thermal insulation has been increased, which affects the comfort of use at low ambient temperatures. The innovative solution is based on a special metalized layer of flexible polyurethane coating with an admixture of silver, combined with a mesh polyester lining. This composition acts as a barrier that effectively reflects the heat energy generated by the body and allows it to be retained inside the clothing.
